

Television / Audio Visual

TV & AUDIO

- Energy Saving Trust Recommended
- Powers all TV and Audio Visual equipment ON or OFF automatically
- Dedicated Permanent On Socket to power recording devices or similar items with timers. Can be used in conjunction with an extension block.
- Provides high quality surge protection for your whole system
- Reduces fire risk
- British Standards compliant

Eliminating standby

Eliminating standby in our homes is not always easy. Those little red lights on your television and home entertainment additions such as surround sound amplifiers, DVD Players and computer consoles are needlessly costing you money every hour.

Research suggests that leaving electrical equipment on standby can reduce equipment lifespan by an average of 15% and creates a needless fire risk.

OneClick Technologies have spent several years developing the world's first patented intelligent plug designed to work automatically and boasts a lifespan of at least 15 years.

Tested to British Standards, RoHS compliant and recommended by the Energy Saving Trust, the IntelliPlug's green credentials, integrity and reliability are endorsed by independently qualified technicians.

How Does It Work?

The TVA106 IntelliPlug learns to recognise the signal from your television remote control which enables it to activate your television automatically into standby mode whenever you are ready to use it. When you have finished using your television you switch it off in the normal way using your remote control and the IntelliPlug does the rest!

Sensor learns your remote signal

Say goodbye to standby.

Instead of simply switching off the television, the clever IntelliPlug continues to record the amount of power being drawn by the television and waits until the internal circuitry has completely powered down into a standby state, only then does the IntelliPlug switch the television and peripheral equipment off. Switching the television power off immediately (as if pulling the plug from the mains) can cause corruption of the internal software in some digital televisions. This can result in the television having to go through a re-boot process.

No more standby – no more wasted power.

To date OneClick have sold almost 1 million products and we estimate that together we've saved approximately 50 million kilograms of Carbon Dioxide emissions.

Television / Audio Visual

Say goodbye to standby.

Specification: TVA106

- **Auto Calibration** - The IntelliPlug continuously measures the amount of electricity being consumed by your TV in active and standby mode, by learning your televisions unique energy pattern the IntelliPlug will only power your peripherals on/off when appropriate - at the right time, every time.
- **Zero-Crossing Detection** - Automatically determines when the power supplied to the peripherals is at an optimum level for creating the least amount of stress to components.
- **Permanent On Socket** - This socket is designed for items which require permanent power such as video recorders or digital TV boxes with built in Personal Video Recorder. You may use an multi block extension socket if you need to plug more than one item into the IntelliPlug.
- **Quality Surge Protection** - will dissipate surges of up to 520 joules of energy/a peak current of 19,000 amps and includes a thermal fuse in case of a catastrophic spike.
- Low standby power of approximately 0.5 watts.
- Saves an average 35 watts per hour depending on the number of connected peripherals. This product can pay for itself in less than a year of use.
- Designed for use in conjunction with trailing adaptors.
- Fast Reaction Time

- Total Maximum Current 13 amps.
- Low energy red neon indicates when the peripheral sockets are on.
- **Plug & Play** - No software required.
- British Standards and RoHS Compliant.
- Can be used for PC and MAC desktop computers.
- Warranted for 1 year against faulty workmanship. Your statutory rights are not affected

Connectivity examples

Examples of Peripheral equipment

- Amplifier
- Games console
- Free View box
- Cassette deck
- CD/DVD player
- Speakers/sub-woofer
- Tuner
- Desktop lamp
- Mobile phone charger
